CHAPTER: Phoebe Framework and Experimental Results for Estimating Fetal Age and Weight
AUTHORS: Loc Nguyen and Thu-Hang Ho
BOOK EDITOR: Thomas F. Heston
DATE: 05.02.2018

FULL CHAPTER REVIEW REPORT

EDITOR'S COMMENTS

Thank you for your submission. This is an interesting topic that would be a valuable addition to the eHealth book. However, we require original content. The submitted chapter shows excessive overlap with the article "Nguyen L, Ho THT (2017) Experimental Results of Phoebe Framework: Optimal Formulas for Estimating Fetus Weight and Age. J Comm Pub Health Nursing 3: 163. doi:10.4172/2471-9846.1000163" I recommend that the authors develop this idea further and present it in a new, unique way.

iThenticate Similarity Index = 54%
This chapter will need revision given the significant amount of overlap with a previously published manuscript.
I recommend developing this idea in a new way that advances the idea, not just repeats what you have already published.

Thank you!
